

Agenda Item 3B

Proposed AT-C Section 210, *Limited Assurance Engagements* (Marked From Extant)

Note – Revisions from the draft presented at the October 2017 ASB meeting are highlighted.

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
Introduction	
.01 This section contains performance and reporting requirements and application guidance for all-review-limited assurance engagements. The requirements and guidance in this section supplement the requirements and guidance in section 105, <i>Concepts Common to All Attestation Engagements</i> .	
Effective Date	
.02 This section is effective for practitioners' review-limited assurance reports dated on or after May 1, 2017 MM, DD, YYYY.	
Objectives	Objectives (Ref: par. 03bii)
.03 In conducting a review-limited assurance engagement, the objectives of the practitioner are to a. reduce attestation risk to a level that is acceptable in the circumstances of the engagement as the basis for expressing a conclusion obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria;	A1. The content of the responsible party's assertion is the same as the content of the written representation required by paragraph 33f. As indicated in paragraph 43, when the practitioner is reporting on the assertion, (a) the responsible party provides the practitioner with a separate written assertion that is bound with or accompanies the practitioner's report, or (b) the assertion is stated in the practitioner's report. As indicated in AT-C section 105, an assertion is a declaration made by a responsible party

Commented [MG1]: Revised to be consistent with definition of "limited assurance engagement" in AT-C section 105.

Commented [MG2]: Consistent with revised paragraph A1 from proposed revised AT-C section 205 (except for reference to AT-C section 320 at the end of paragraph A1 from proposed revised AT-C section 205).

Commented [MG3]: All definitions are included in revised AT-C section 105.

Direct Engagements: AT-C 210, *Review Engagements* (Marked from Extant)
ARSC Meeting, January 9-11, 2018

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
subject-matter AT-C section is relevant to the engagement when it is in effect, and the circumstances addressed by the AT-C section exist. (Ref: par. .A1 A2)	information, section 105, this section, and section 310, <i>Reporting on Pro Forma Financial Information</i> , would be relevant.
.06 <u>.05</u> The practitioner should consider whether the nature of review—the procedures to be performed would enable the practitioner to obtain sufficient appropriate review evidence to obtain limited assurance. (Ref: par. .A2)	.A2 Review procedures generally are limited to inquiries and analytical procedures. In circumstances in which inquiry and analytical procedures are not expected to provide sufficient appropriate review evidence, or when the nature of the subject matter does not lend itself to the application of analytical procedures, the practitioner may perform other procedures that he or she believes can provide the practitioner with a level of assurance equivalent to that which inquiries and analytical procedures would have provided. If the practitioner cannot design other procedures to obtain sufficient appropriate review evidence, a review engagement may not be appropriate.
.07 <u>.06</u> A practitioner should not perform a review of limited assurance engagement on (Ref: par. .A2) a. prospective financial information, b. internal control, or c. compliance with requirements of specified laws, regulations, rules, contracts, or grants.	
Agreeing on the Terms of the Engagement	Agreeing on the Terms of the Engagement (Ref: par. .0807-and.098b)
.08 <u>.07</u> The practitioner should agree upon the terms of the engagement with the engaging party. The agreed-upon terms of the engagement should be specified in sufficient detail in an engagement letter or other suitable form of written agreement. (Ref: par. A3)	.A3 It is in the interests of both the engaging party and the practitioner to document the agreed-upon terms of the engagement before the commencement of the engagement to help avoid misunderstandings. The form and content of the engagement letter or other suitable form of written agreement will vary with the engagement circumstances.

Commented [MG4]: Question for ASB consideration – why are there these prohibitions? The ARSC requests that the ASB consider whether there continues to be a good reason for the prohibition – especially with respect to PFI.

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
<p>.09-08 The agreed-upon terms of the engagement should include the following:</p> <ul style="list-style-type: none"> a. The objective and scope of the engagement b. The responsibilities of the practitioner (Ref: par. .A4) c. A statement that the engagement will be conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants d. The responsibilities of the responsible party and the responsibilities of the engaging party, if different<u>appropriate parties, including</u> (Ref: par. A5-A6) 	<p>.A4 A practitioner may further describe the responsibilities of the practitioner by adding the following items to the engagement letter or other suitable form of written agreement:</p> <ul style="list-style-type: none"> a. A statement that a review<u>the engagement</u> is designed to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria b. A statement that a <u>review-limited assurance engagement</u> is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether the subject matter is in accordance with (or based on) the criteria, in all material respects, or the assertion is fairly stated, in all material respects, in order to express an opinion, and that, accordingly, the practitioner will not express such an opinion</p> <p>f. Regardless of the procedures performed by the practitioner, the responsible party is required to accept responsibility for its assertion and the subject matter and may not base its assertion solely on the practitioner's procedures.</u></p> <p><u>.A7 The engaging party may request that the practitioner recommend or assist in the development of criteria for the engagement. If the engaging party agrees to the criteria recommended by the practitioner, the engaging party is deemed to have identified the criteria.</u></p> <p><u>.A8 If relevant, the practitioner may include in the engagement letter, the responsible party's acknowledgment that it intends to measure or evaluate the subject matter against the criteria and provide the practitioner with a written assertion.</u></p>

Commented [MG6]: Consistent with paragraph .A6 from proposed revised AT-C section 205.

Commented [MG7]: Consistent with paragraph .A9 from proposed revised AT-C section 205.

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
<p>with a representation letter at the conclusion of the engagement (Ref: par. A8)</p>	
<p>.10 09 Although an engagement may recur, each engagement is considered a separate engagement. The practitioner should assess whether circumstances require revision to the terms of a preceding engagement. If the practitioner concludes that the terms of the preceding engagement need not be revised for the current engagement, the practitioner should remind the engaging party of the terms of the current engagement, and the reminder should be documented.</p>	
<p>Requesting a Written Assertion</p>	<p>Requesting a Written Assertion (Ref: par. .11)</p>
<p>.11 The practitioner should request from the responsible party a written assertion about the measurement or evaluation of the subject matter against the criteria. When the engaging party is the responsible party and refuses to provide a written assertion, paragraph .59 requires the practitioner to withdraw from the engagement, when withdrawal is possible under applicable laws and regulations. When the engaging party is not the responsible party, and the responsible party refuses to provide a written assertion, the practitioner need not withdraw from the engagement. In that case, paragraph .60 requires the practitioner to disclose that refusal in the practitioner's report and restrict the use of the report to the engaging party. (Ref: par. .A5 .A8 and .A76)</p>	<p>.A5 The language of the responsible party's written assertion in paragraph .11 may need to be tailored to reflect the nature of the subject matter and criteria for the engagement. Examples of language that meet the requirements in paragraph .11 include the following:</p> <ul style="list-style-type: none"> • The subject matter is presented in accordance with (or based on) the criteria. • The subject matter achieved the objectives, for example, when the objectives are the criteria. <p>.A6 Situations may arise in which the current responsible party was not present during some or all of the period covered by the practitioner's report. Such persons may contend that they are not in a position to provide a written assertion that covers the entire period because they were not in place during some or all of the period. This fact, however, does not diminish such persons' responsibilities for the subject matter as a whole. Accordingly, the requirement for the practitioner to request a written assertion from the responsible party</p>

Commented [MG5]: Consistent with paragraph .8f from proposed revised AT-C section 205.

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
	<p>that covers the entire relevant period(s) still applies.</p> <p>.A7 Paragraph .33a requires the practitioner to request a written representation from the responsible party that is the same as the responsible party's assertion. If the responsible party provides the practitioner with the written representation in paragraph .33a, the practitioner need not request a separate written assertion, unless a separate written assertion is called for by the engagement circumstances. (Ref: par. .11)</p> <p>.A8 A practitioner may also be engaged to assist the responsible party in measuring or evaluating the subject matter against the criteria in connection with the responsible party providing a written assertion. Regardless of the procedures performed by the practitioner, the responsible party is required to accept responsibility for its assertion and the subject matter and may not base its assertion solely on the practitioner's procedures.²</p> <p>²The "Nonattest Services" subtopic (ET sec. 1.295) of the AICPA Code of Professional Conduct addresses the practitioner's provision of nonattest services for an attest client.</p>
<p>Planning and Performing the Engagement</p> <p>.12-10 The practitioner should set the scope, timing, and direction of the engagement and determine the nature, timing, and extent of the planned procedures that are required to be carried out in order to achieve the objectives of the engagement. <u>The nature, timing, and extent of the practitioner's procedures may be affected by the extent to which the responsible party has measured or evaluated the subject matter against the criteria. The practitioner should exercise professional judgment in selecting and applying procedures that are designed to accumulate sufficient appropriate evidence to that</u></p>	<p>Planning and Performing the Engagement (Ref: par. .1210-.1311)</p> <p>.A9 Planning involves the engagement partner and other key members of the engagement team and may involve the practitioner's specialists. Adequate planning helps the practitioner devote appropriate attention to important areas of the engagement, identify potential problems on a timely basis, and properly organize and manage the engagement in order for it to be performed in an effective and efficient manner. Adequate planning also assists the practitioner in properly assigning work to engagement team members, and facilitates the direction,</p>

Further, it assists, when applicable, the coordination of work performed by other practitioners and practitioner's specialists. The nature and extent of planning activities will vary with the engagement circumstances, for example, the complexity of the assessment or evaluation of the subject matter and the practitioner's previous experience with it. Examples of relevant matters that may be considered include the following:</p> <ul style="list-style-type: none"> • The characteristics of the engagement that define its scope, including the terms of the engagement, the characteristics of the underlying subject matter, and the criteria • The expected timing and nature of the communications required • The results of preliminary engagement activities, such as client acceptance, and, when applicable, whether knowledge gained on other engagements performed by the engagement partner for the appropriate party(ies) is relevant • The engagement process, including possible sources of review—evidence, and choices among alternative measurement or evaluation methods • The practitioner's understanding of the appropriate party(ies) and its (their) environment, including the risks that the subject matter may be materially misstated • Identification of intended users and their information needs and consideration of materiality and the components of attestation risk

Commented [MG8]: Consistent with paragraph .10 of proposed revised AT-C section 205.

	<ul style="list-style-type: none">• The risk of fraud relevant to the engagement• The effect on the engagement of using the internal audit function <p>.A10 The practitioner may decide to discuss elements of planning with the appropriate party(ies) to facilitate the conduct and management of the engagement (for example, to coordinate some of the planned procedures with the work of the responsible party's personnel). Although these discussions often occur, the elements of planning remain the practitioner's responsibility. When discussing planning matters, care is needed to avoid compromising the effectiveness of the engagement. For example, discussing the nature and timing of detailed procedures with the responsible party may compromise the effectiveness of the engagement by making the procedures too predictable.</p> <p>.A11 Planning is not a discrete phase but, rather, a cumulative and iterative process throughout the engagement. As a result of unexpected events, changes in conditions, or review evidence obtained, the practitioner may need to revise the nature, timing, and extent of planned procedures.</p> <p>.A12 In smaller or less complex engagements, the entire engagement may be conducted by a very small engagement team, possibly involving the engagement partner (who may be a sole practitioner) working without any other engagement team members. With a smaller team, coordination of, and communication among, team members is easier. In such cases, planning the engagement need not be a complex or time-</p>

The practitioner's consideration of materiality is a matter of professional judgment and is affected by the practitioner's perception of the common information needs of intended users as a group. In this context, it is reasonable for the practitioner to assume that intended users</p> <ul style="list-style-type: none">a. have a reasonable knowledge of the subject matter and a willingness to study the subject matter with reasonable diligence.b. understand that the subject matter is measured or evaluated and reviewed-subjected to a limited assurance engagement to appropriate levels of materiality and have an understanding of any materiality concepts included in the criteria.c. understand any inherent uncertainties involved in measuring or evaluating the subject matter.

<p>.15-14 To obtain limited assurance, the practitioner should obtain sufficient appropriate review evidence in order to reduce attestation risk to a level that is acceptable in the circumstances of the engagement as a basis for expressing a conclusion about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria, or the assertion, in order for it to be fairly stated.</p>	
<p>.16 The practitioner should apply professional judgment in determining the specific nature, timing, and extent of review procedures. Based on (Ref: par. Irrespective of whether any such areas have been identified, paragraph 15b requires the practitioner to design and perform procedures to obtain limited assurance to support the conclusion in the practitioner's report.</p>

Commented [MG10]: Consistent with paragraph 48L to ISAE 3000.

Commented [MG11]: This paragraph is consistent with paragraph A111 from ISAE 3000. The last sentence is modified so as not to be in present tense.

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
	<p>.A20 Review evidence obtained through the performance of analytical procedures and inquiry will ordinarily provide the practitioner with a reasonable basis for obtaining limited assurance. However, the practitioner may determine it is appropriate to perform additional procedures if the practitioner determines such procedures to be necessary in order to meet the objectives of this section.</p> <p>.A21 The degree to which procedures beyond analytical procedures and inquiry may be performed may be influenced by factors specific to the engagement. The practitioner may substitute other procedures that provide equivalent levels of review evidence.</p> <p>.A22-A24 Information may come to the practitioner's attention that differs significantly from that on which the determination of planned procedures was based. As the practitioner performs planned procedures, the review evidence obtained may cause the practitioner to perform additional procedures. Such procedures may include asking the responsible party to examine the matter identified by the practitioner and to make adjustments to the subject matter, if appropriate.</p> <p>.A23-A25 In some cases, a subject-matter AT-C section may include requirements that affect the nature, timing, and extent of procedures. For example, a subject-matter AT-C section may describe the nature or extent of particular procedures to be performed in a particular type of engagement. Even in such cases, determining the exact nature, timing, and extent of procedures is a matter of professional judgment and will vary from one engagement to the next.</p>

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
<p>.17 Analytical procedures may not be possible when the subject matter is qualitative, rather than quantitative. In those circumstances, the practitioner should perform other procedures, in addition to inquiries, that provide equivalent levels of review evidence. (Ref: par. .A24)</p>	<p>.A24 Review procedures generally are limited to inquiries and analytical procedures. In circumstances in which inquiry and analytical procedures are not expected to provide sufficient appropriate review evidence, or when the nature of the subject matter does not lend itself to the application of analytical procedures, the practitioner may perform other procedures that he or she believes can provide the practitioner with a level of assurance equivalent to that which inquiries and analytical procedures would have provided. If the practitioner cannot design other procedures to obtain sufficient appropriate review evidence, a review engagement may not be appropriate.</p>
<p>.18-16 The practitioner should place increased focus in those areas in which the practitioner believes there are increased risks that the subject matter may be materially misstated. (Ref: par. .A25A26-.A26A27)</p>	<p>.A25-A26 The results of the practitioner's analytical procedures and inquiries may modify the practitioner's risk awareness.</p> <p>.A26-A27 The practitioner may become aware of a matter(s) that causes the practitioner to believe that the subject matter may be materially misstated when, for example, performing analytical procedures if the practitioner identifies a fluctuation or relationship that is inconsistent with other relevant information or that differs significantly from expected amounts or ratios. In such cases, the practitioner's investigation of such differences may include inquiring of the appropriate party(ies) responsible party or performing other procedures as appropriate in the circumstances</p>
<p>Analytical Procedures</p>	<p>Analytical Procedures (Ref: par. .1917-.2018)</p>
<p>.19-17 When designing and performing analytical procedures, the practitioner should (Ref: par. .A27A28-.A28A29)</p> <p>a. determine the suitability of particular analytical procedures for the subject matter, taking into account the practitioner's awareness of risks;</p>	<p>.A27-A28 An understanding of the purposes of analytical procedures and the limitations of those procedures is important. Accordingly, the identification of the relationships and types of data used, as well as conclusions reached when recorded amounts are compared to expectations, requires professional judgment by the practitioner.</p>

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
<p>b. evaluate the reliability of data from which the practitioner's expectation is developed, taking into account the source, comparability, nature, and relevance of information available; and</p> <p>c. develop an expectation with respect to recorded amounts or ratios.</p>	<p>.A28–A29 Analytical procedures involve comparisons of expectations developed by the practitioner to recorded amounts or ratios developed from recorded amounts. The practitioner develops such expectations by identifying and using plausible relationships that are reasonably expected to exist based on the practitioner's understanding of the subject matter; the practices used by the responsible party to measure, recognize, and record the subject matter; and, if applicable, the industry in which the entity operates.</p>
<p>.20-18 If analytical procedures identify fluctuations or relationships that are inconsistent with other relevant information or that differ significantly from expected amounts or ratios, the practitioner should (Ref: par. .A29A30)</p> <p>a. inquire of the responsible party about such differences and</p> <p>b. consider the responses to these inquiries to determine whether other procedures are necessary in the circumstances.</p>	<p>.A29–A30 Analytical procedures in a review-limited assurance engagement are not designed to identify misstatements with the level of precision expected in an examination engagement. Further, when significant fluctuations, relationships, or differences are identified, appropriate review-evidence in a review-limited assurance engagement may often be obtained by making inquiries of the responsible party and considering responses received in the light of known engagement circumstances without obtaining additional evidence required in the case of an examination engagement.</p>

The practitioner should consider the results communicated to the practitioner by the responsible party and the potential effect, if any, on the practitioner's report.</p>	
<p>.26–25 If the practitioner believes the subject matter may be materially misstated, the practitioner should perform additional procedures sufficient to obtain limited assurance about whether any material modifications should be made to the subject matter in order for it to be in accordance with (or based on) the criteria or the assertion in order for it to be fairly stated.</p>	
<p>Using the Work of a Practitioner's Specialist or Internal Auditors</p>	
<p>.27 When the practitioner expects to use the work of a practitioner's specialist or internal auditors, the practitioner should apply the requirements in section 205, <i>Examination Engagements</i>, and the related application guidance, as appropriate, for a review engagement.[†]</p>	
<p>[†] Paragraphs 36–44 of section 205, <i>Examination Engagements</i>.</p>	

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
Evaluating the Results of Review Procedures	Evaluating the Results of Review Procedures (Ref: par. .2826-.2927)
<p>.28-26 The practitioner should accumulate misstatements identified during the engagement, other than those that are clearly trivial. (Ref: par. .A33A35-.A34A36)</p>	<p>.A33-A35 Uncorrected misstatements are accumulated during the engagement for the purpose of evaluating whether, individually or in aggregate, they are material when forming the practitioner's conclusion. (See paragraph .42b.)</p> <p>.A34-A36 "Clearly trivial" is not another expression for "not material." Matters that are clearly trivial will be of a wholly different (smaller) order of magnitude than materiality and will be matters that are clearly inconsequential, whether taken individually or in the aggregate and whether judged by any criteria of size, nature, or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the matter is considered not to be clearly trivial.</p>
<p>.29-27 The practitioner should evaluate the sufficiency and appropriateness of the review evidence obtained in the context of the engagement and, if necessary, attempt to obtain further review evidence. The practitioner should consider all relevant review evidence, regardless of whether it appears to corroborate or contradict the measurement or evaluation of the subject matter against the criteria. (Ref: par. .A35A37-.A37A39)</p>	<p>.A35-A37 Sufficient appropriate review evidence is necessary to support the practitioner's conclusion and report.</p> <p>.A36-A38 The sufficiency and appropriateness of review evidence are interrelated. Sufficiency of review evidence is the measure of the quantity of review evidence. The quantity of the review evidence needed is affected by the risks of material misstatement and also by the quality of such review evidence.</p> <p>.A37-A39 Whether sufficient appropriate review evidence has been obtained on which to base the practitioner's conclusion is a matter of professional judgment.</p>
<p>.30-28 If the practitioner concludes that the subject matter is materially misstated or is unable to obtain review evidence sufficient for limited assurance, the practitioner should consider the implications for the practitioner's conclusion in paragraphs .5449-.6056.</p>

<p>.31-29 The practitioner should inquire whether the responsible party, and if different, the engaging party, is aware of any events subsequent to the period (or point in time) covered by the review engagement up to the date of the practitioner's report that could have a significant effect on the subject matter or assertion. If the practitioner becomes aware, through inquiry or otherwise, of such an event, or any other event that is of such a nature and significance that its disclosure is necessary to prevent users of the report from being misled, and information about that event is not adequately disclosed by the responsible party in the subject matter or in its assertion, the practitioner should take appropriate action. (Ref: par. .A38A40-.A40A42)</p>	<p>.A38-A40 For certain subject-matter AT-C sections, specific subsequent events requirements and related application guidance have been developed for engagement performance and reporting.</p> <p>.A39-A41 Procedures that a practitioner may perform to identify subsequent events include inquiring about and considering information</p> <ul style="list-style-type: none"> • contained in relevant reports issued during the subsequent period by internal auditors, other practitioners, or regulatory agencies • obtained through other professional engagements for that entity <p>.A40-A42 If the responsible party refuses to disclose a subsequent event for which disclosure is necessary to prevent users of the practitioner's report from being misled, appropriate actions the practitioner may take include</p> <ul style="list-style-type: none"> • disclosing the event in the report and modifying the practitioner's conclusion. • withdrawing from the engagement.

This may include discussing the matter with the appropriate party(ies) and requesting the appropriate party(ies)'s cooperation in whatever investigation or further action that may be necessary. The specific actions to be taken in a particular case by the appropriate party(ies) and the practitioner may vary with the circumstances. Consideration may be given to, among other things, the time elapsed since the date of the report and whether issuance of a subsequent report is imminent. The practitioner may need to perform additional procedures deemed necessary to determine whether the subject matter or assertion needs revision and whether the previously issued report continues to be appropriate.</p> <p>A42-A44 Depending on the circumstances, the practitioner may determine that notification of the situation by the appropriate party(ies) to persons who would attach importance to these facts and who are currently using, or are likely to use, the practitioner's report who would attach importance to the facts is necessary. This may be the case, for example, when</p> <ul style="list-style-type: none"><i>a.</i> the report is not to be relied upon because the subject matter or assertion needs revision or the practitioner is unable to determine whether revision is necessary, and<i>b.</i> issuance of a subsequent report is not imminent. <p>If the appropriate party(ies) failed to take the necessary steps to prevent reliance on the report, the practitioner's course of action depends upon the practitioner's legal and ethical rights and obligations. The person(s) from whom the practitioner requests written representations is ordinarily a member of senior management or those charged with governance depending on, for example, the management and governance structure of the responsible party(ies), which may vary by entity, reflecting influences such as size and ownership characteristics.</p> <p>.A44–A47 Representations by the responsible party cannot replace other <u>review</u> evidence the practitioner could reasonably expect to be available. Although written representations provide <u>review</u> evidence, they do not provide sufficient appropriate <u>review</u> evidence on their own about any of the matters with which they deal. Furthermore, the fact that the practitioner has received reliable written representations does not affect the nature or extent of other <u>review</u> evidence that the practitioner obtains.</p>

Commented [MG41]: Consistent with paragraph A189 of ISAE 3000 (except for reference in ISAE 3000 to "possible effects.")

Commented [MG42]: Moved to paragraph .51 to be consistent with the format of proposed revised AT-C section 205.

Commented [MG43]: Consistent with paragraph 72 of proposed revised AT-C section 205. ISAE 3000 does not include a requirement as to when to express an adverse conclusion.

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
<p>.56-54 The practitioner's conclusion on the subject matter or assertion should be clearly separated from any paragraphs emphasizing matters related to the subject matter, describing or any other reporting responsibilities, <u>or providing other information or explanations that are not intended to affect the practitioner's conclusion.</u> (Ref: par. A64)</p>	
<p>.57-55 When the conclusion is qualified <u>modified</u>, reference to an external specialist is permitted when such reference is relevant to an understanding of the qualification <u>modification</u> to the practitioner's conclusion. The practitioner should indicate in the practitioner's report that such reference does not reduce the practitioner's responsibility for that conclusion.</p>	
<p>Scope Limitations</p>	<p>Scope Limitations (Ref: par. .5856)</p>
<p>.58-56 If the practitioner is unable to obtain sufficient appropriate review evidence, a scope limitation exists. When a scope limitation exists, the practitioner should withdraw from the engagement, when withdrawal is possible under applicable laws and regulations. (Ref: par. -.A84A94- .A86A95)</p>	<p>.A84-A94 The procedures performed in a review-limited assurance engagement are, by definition, limited compared with those performed in an examination engagement. Limitations known to exist prior to accepting a review-limited assurance engagement are a relevant consideration when establishing whether the preconditions for a review-limited assurance engagement are present, in particular, whether the practitioner expects to be able to obtain the evidence needed to arrive at the practitioner's conclusion. (See section 105.)⁴ If a further limitation is imposed by the appropriate party(ies) after a review limited assurance engagement has been accepted, it may be appropriate to withdraw from the engagement, when withdrawal is possible under applicable laws and regulations.</p> <p>⁴ Paragraph .25b(iii) of section 105, <i>Concepts Common to All Attestation Engagements</i>.</p> <p>A85 The inability to obtain written representations from the responsible party ordinarily would result in a scope limitation.</p>

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
	<p>However, when the engaging party is not the responsible party, paragraph .34 enables the practitioner to make inquiries of the responsible party, and if the responsible party's oral responses enable the practitioner to conclude that the practitioner has sufficient appropriate review evidence to form a conclusion about the subject matter, paragraph .39a indicates that this would not cause a scope limitation. Further, paragraph .39a requires that the practitioner's report, in these circumstances, contain an alert paragraph that restricts the use of the report to the engaging party.</p> <p>.A86-A95 An inability to perform a specific procedure does not constitute a scope limitation if the practitioner is able to obtain sufficient appropriate review evidence by performing alternative procedures.</p>
Responsible Party Refuses to Provide a Written Assertion	Responsible Party Refuses to Provide a Written Assertion (Ref: par. .60)
<p>.59 If the engaging party is the responsible party and refuses to provide the practitioner with a written assertion as required by paragraph .11, the practitioner should withdraw from the engagement when withdrawal is possible under applicable law or regulation.</p>	
<p>.60 When the engaging party is not the responsible party and the responsible party refuses to provide the practitioner with a written assertion, the practitioner may report on the subject matter but should disclose in the practitioner's report the responsible party's refusal to provide a written assertion and should restrict the use of the practitioner's report to the engaging party. (Ref: par. .A87-.A88)</p>	<p>.A87 The following is an example of the disclosure required by paragraph .60:</p> <p>Attestation standards established by the American Institute of Certified Public Accountants require that we request a written statement from <i>[identify the responsible party]</i> stating that <i>[identify the subject matter]</i> that we reviewed has been accurately measured or evaluated. We requested that <i>[identify the responsible party]</i> provide such a written statement but <i>[identify the responsible party]</i> refused to do so</p>

Introduction, Objectives, Definitions, and Requirements	Application and Other Explanatory Material
	<p>.A88 The practitioner's report discussed in paragraph .60 is appropriate only when the engagement is to report on the subject matter; it is not appropriate for a report on an assertion. When reporting on an assertion, the practitioner is required to obtain a written assertion from the responsible party.</p>
<p>Communication Responsibilities</p> <p>.61-57 The practitioner should communicate to the responsible party known and suspected fraud and noncompliance with laws or regulations, as well as uncorrected misstatements. When the engaging party is not the responsible party, the practitioner should also communicate this information to the engaging party. (Ref: par. .A89A96)</p>	<p>Communication Responsibilities (Ref: par. .6157)</p> <p>.A89-A96 Other matters that may be appropriate to communicate to the appropriate party(ies) responsible party or, if different, the engaging party, include deficiencies in internal control identified during the engagement, or bias in the measurement, evaluation, or disclosure of the subject matter.</p>
<p>Documentation</p> <p>.62-58 The practitioner should prepare engagement documentation that is sufficient to determine (Ref: par. .A90A97-.A93A100)</p> <ul style="list-style-type: none"> a. the nature, timing, and extent of the procedures performed to comply with relevant AT-C sections and applicable legal and regulatory requirements, including <ul style="list-style-type: none"> i. the identifying characteristics of the specific items or matters tested; ii. who performed the engagement work and the date such work was completed; iii. the discussions with the responsible party or others about findings or issues that, in the practitioner's professional judgment, are significant, including the nature of the 	<p>Documentation (Ref: par. .6258)</p> <p>.A90-A97 Documentation includes a record of the practitioner's reasoning on all significant findings or issues that require the exercise of professional judgment and related conclusions. The existence of difficult questions of principle or professional judgment calls for the documentation to include the relevant facts that were known by the practitioner at the time the conclusion was reached.</p> <p>.A91-A98 It is neither necessary nor practical to document every matter considered, or professional judgment made, during an engagement. Further, it is unnecessary for the practitioner to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included in the engagement file. Similarly, the practitioner need not include in the engagement file superseded drafts of working papers, notes that reflect incomplete or</p>

Exhibit—Illustrative Practitioner’s ~~Review~~ Limited Assurance Reports

The illustrative practitioner's ~~review~~ limited assurance reports in this exhibit meet the applicable reporting requirements in paragraphs .4440–.6056. A practitioner may use alternative language in drafting a ~~review~~ limited assurance report, provided that the language meets the applicable requirements in paragraphs .4440–.6056. ~~The criteria for evaluating the subject matter in examples 1 and 3 have been determined by the practitioner to be suitable and available to all users of the report; therefore, these reports may be for general use. The criteria for evaluating the subject matter in example 2 are suitable but available only to specified parties; therefore, use of this report is restricted to the specified parties who either participated in the establishment of the criteria or can be presumed to have an adequate understanding of the criteria. (See paragraph 48 for the information to be included in a separate paragraph of the report that contains an alert that restricts the use of the report and paragraph 49 for the content of that paragraph when the engagement is also performed in accordance with *Government Auditing Standards*.)~~

~~Example 1: Practitioner’s Review Report on Subject Matter, Unmodified Conclusion~~

The following is an illustrative practitioner's review report in which the practitioner has reviewed the subject matter and is reporting on the subject matter.

Independent Accountant's Review Report

[Appropriate Addressee]

We have reviewed *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*. XYZ Company's management is responsible for *[identify the subject matter, for example, presenting the schedule of investment returns]* in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*. Our responsibility is to express a conclusion on *[identify the subject matter, for example, the schedule of investment returns]* based on our review.

~~Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to *[identify the subject matter, for example, the schedule of investment returns]* in order for it to be in accordance with (or based on) the criteria. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether *[identify the subject matter, for example, the schedule of investment returns]* is in accordance with (or based on) the criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.~~

~~*[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]*~~

~~*[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]*~~

~~Based on our review, we are not aware of any material modifications that should be made to *[identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]*, in order for it be in accordance with (or based on) *[identify the criteria, for example, the ABC criteria set forth in Note 1]*.~~

Example 2: Practitioner's Review Report on an Assertion; Unmodified Conclusion; Use of the Report Is Restricted to Specified Parties

~~The following is an illustrative practitioner's report for a review engagement in which the practitioner has reviewed the responsible party's assertion and is reporting on that assertion. Although suitable criteria exist for the subject matter, use of the report is restricted to specified parties because the criteria are available only to the specified parties.~~

~~Independent Accountant's Review Report~~

~~[Appropriate Addressee]~~

~~We have reviewed management of XYZ Company's assertion that [identify the assertion, including the subject matter and the criteria, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX, is presented in accordance with (or based on) the ABC criteria set forth in Note 1]. XYZ Company's management is responsible for its assertion. Our responsibility is to express a conclusion on management's assertion based on our review.~~

~~Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform the review to obtain limited assurance about whether any material modifications should be made to management's assertion in order for it to be fairly stated. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether management's assertion is fairly stated, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. We believe that our review provides a reasonable basis for our conclusion.~~

~~[Include a description of significant inherent limitations, if any, associated with the measurement or evaluation of the subject matter against the criteria.]~~

~~[Additional paragraph(s) may be added to emphasize certain matters relating to the attestation engagement or the subject matter.]~~

~~Based on our review, we are not aware of any material modifications that should be made to management of XYZ Company's assertion in order for it to be fairly stated.~~

~~This report is intended solely for the information and use of [identify the specified parties, for example, ABC Company and XYZ Company], and is not intended to be, and should not be, used by anyone other than the specified parties.~~

~~Example 3: Practitioner's Review Report on Subject Matter, Qualified Conclusion~~

~~The following is an illustrative practitioner's report for a review engagement in which the practitioner expresses a qualified conclusion because the review identified conditions that, individually or in combination, result in one or more material, but not pervasive, misstatements of the subject matter, based on the criteria. The practitioner has reviewed the subject matter and is also reporting on the subject matter. Paragraph .53 states, "If the practitioner has concluded that the material misstatement results in a qualified conclusion, the practitioner should report directly on the subject matter, not on the assertion, even when the assertion acknowledges the misstatement."~~

~~Independent Accountant's Review Report~~

~~[Appropriate Addressee]~~

~~We have reviewed [identify the subject matter, for example, the accompanying schedule of investment returns of XYZ Company for the year ended December 31, 20XX]. XYZ Company's management is responsible for [identify the subject matter, for example, presenting the schedule of investment returns] based on [identify the criteria, for example, the ABC criteria set forth in Note 1]. Our responsibility is to express a conclusion on [identify the subject matter, for example, the schedule of investment returns] based on our review.~~

~~Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. Example 1: Practitioner's Review Limited Assurance Report on Subject Matter a Statement of Greenhouse Gas Emissions: Unmodified Conclusion

Independent Practitioner's Limited Assurance Report on Statement of Greenhouse Gas Emissions

[Appropriate Addressee]

We have undertaken a limited assurance engagement of the accompanying Greenhouse Gas (GHG) Emissions Statement (GHG Statement) of XYZ Company for the year ended December 31, 20X1.

XYZ Company's Responsibility for the GHG Statement

XYZ Company is responsible for the preparation of the GHG Statement in accordance with the criteria set forth in Note 1 (the Criteria). This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of a GHG Statement that is free from material misstatement, whether due to fraud or error.

As discussed in Note 1 to the GHG Statement, GHG quantification is subject to inherent uncertainty because of incomplete scientific knowledge used to determine emissions factors and the values needed to combine emissions of different gases.

Our Responsibility

Our responsibility is to express a conclusion on the GHG Statement based on our limited assurance engagement. We conducted our limited assurance engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform this engagement to obtain limited assurance about whether any material modifications should be made to the GHG Statement in order for it to be in accordance with the Criteria.

We have complied with the independence and other ethical requirements of the Code of Professional Conduct established by the AICPA.

We applied the Statements on Quality Control Standards established by the AICPA and, accordingly, maintain a comprehensive system of quality control.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than, an examination. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

Limited Assurance Conclusion

Based on our limited assurance engagement, we are not aware of any material modifications that should be made to XYZ Company's GHG Statement for the year ended December 31, 20X1 in order for it to be in accordance with the criteria applied as explained in Note 1 to the GHG Statement.

Example 2: Practitioner's Limited Assurance Report on Corporate Responsibility Report; Qualified Conclusion

Independent Practitioner's Limited Assurance Report on Corporate Responsibility Report

[Appropriate Addressee]

We have undertaken a limited assurance engagement of the accompanying Corporate Responsibility Report (the “Report”) of ABC Company for the year ended July 31, 20X1.

ABC Company’s Responsibility for the Report

ABC Company is responsible for the preparation of the Report in accordance with ABC Company’s Corporate Responsibility Reporting Guidance 20X1 as set out at www.abccompany.com (the “Reporting Criteria”) and for selectin and developing the Reporting Criteria. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of a Report that is free from material misstatement, whether due to fraud or error.

The nature of non-financial information; the absence of a significant body of established practice on which to draw; and the methods and precision used to measure non-financial information, allow for different, but acceptable evaluation and measurement techniques and can result in materially different measurements, affecting comparability between entities and over time.

Our Responsibility

Our responsibility is to express a conclusion on the Report based on **our limited assurance engagement**. We conducted our limited assurance engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform this engagement to obtain limited assurance about whether any material modifications should be made to the Report in order for it to be in accordance with the Reporting Criteria.

We have complied with the independence and other ethical requirements of the Code of Professional Conduct established by the AICPA.

We applied the Statements on Quality Control Standards established by the AICPA and, accordingly, maintain a comprehensive system of quality control.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than, an examination. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had an examination been performed.

Basis for Qualified Conclusion

A significant portion of the non-hazardous waste figure of 320,000 tons set out in the Report on page 23 is calculated using an estimation methodology. Owing to the nature of ABC Company's waste data measurement procedures and records in the year ended July 31, 20X1, we were unable to obtain sufficient appropriate evidence to assess whether the estimation methodology is a reasonable basis for the determination of the non-hazardous waste figure. Consequently, we were unable to determine whether the non-hazardous waste figure has been properly prepared in accordance with the Reporting Criteria. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

Limited Assurance Conclusion

Based on our limited assurance engagement, except for the possible effects of the matter described in the Basis for Qualified Conclusion paragraph, we are not aware of any material modifications that should be made to ABC Company's Report for the year ended July 31, 20X1 in order for it to be in accordance with the Reporting Criteria.

Example 3: Practitioner's Limited Assurance Report on Sustainability Report; Adverse Conclusion

Independent Practitioner's Limited Assurance Report on Sustainability Report

[Appropriate Addressee]

We have undertaken a limited assurance engagement of the sustainability information in the Sustainability Report of ABC Company (the "Sustainability Report") for the period January 1, 20X1 to December 31, 20X1.

ABC Company's Responsibility for the Sustainability Report

ABC Company is responsible for the preparation of the Sustainability Report in accordance with the criteria set forth in the G4 Sustainability Reporting Guidelines in the Global Reporting initiative (GRI) (the "GRI Criteria"). This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of a Sustainability Report that is free from material misstatement, whether due to fraud or error.

Our Responsibility

Our responsibility is to express a conclusion on the Sustainability Report based on our limited assurance engagement. We conducted our limited assurance engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. Those standards require that we plan and perform this engagement to obtain limited assurance about whether any material modifications should be made to the Sustainability Report in order for it to be in accordance with the GRI Criteria.

We have complied with the independence and other ethical requirements of the Code of Professional Conduct established by the AICPA.

We applied the Statements on Quality Control Standards established by the AICPA and, accordingly, maintain a comprehensive system of quality control.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than, an examination. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had an examination been performed. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our conclusion.

Basis for Adverse Conclusion

ABC Company has not...

Had ABC Company properly accounted for... many elements in the Sustainability Report would have been materially affected. The effects on the Sustainability Report has not been determined.

Adverse Conclusion

Because of the significance of the matter described in the Basis for Adverse Conclusion section of our report, ABC Company's Sustainability Report is not in accordance with the GRI Criteria.
